

YV RPO 107 SAFETY BARS

YV RPO 107 was fitted with safety bars over the windows. The larger windows next to the "person" door had horizontal bars while the other narrower windows had vertical bars. This file can be printed on transparent overhead projection film and the bars cut out and fitted to the model. The O scale bars are specifically sized to fit the Southern Car and Foundry resin kit. The HO scale bars are oversize to fit the various available brass models.
