

MODELING MERCED TO SNELLING

The information on these CDs is intended to help model the area between Merced and Snelling. There are a total of 336 pages of photos that include 321 photos (of which 248 are unpublished). There are photos of nearly all of the buildings within this area of the railroad to help build more accurate models and also train photos which help understand the terrain and scenery along this section of the Yosemite Valley Railroad.

The following summarizes the number of pages, number of photos, and number of unpublished photos in each Adobe Acrobat .pdf file on this two-CD set:
